Yard
NSGS Badalona Yard

Refit period
7 months. October 2022 - May 2023

Refit hours
2.500 h

Refit Overview

The transformation of Swan 98-002 Drifter Cube, which commenced in October 2022 and concluded in May 2023, encompassed a comprehensive overhaul focusing on two primary objectives. Firstly, substantial interior enhancements were made to optimize space utilization and enhance habitability. This included the installation of new Corian countertops in guest and crew area bathrooms, as well as the kitchen, alongside the custom ventilation hatches in forward crew and midship guest cabins. Additionally, bespoke furniture pieces were crafted to augment storage and functionality, with modifications made to existing furniture to maximize space in crew quarters. Secondly, significant improvements were made to enhance navigational capabilities and maneuverability. This involved replacing the original rigging with ECSix Carbon rigging from Future Fibers to enhance sailing performance, alongside the installation of a stern thruster to facilitate maneuvering, a project requiring comprehensive technical oversight and collaboration with subcontractors. Furthermore, a range of preparatory tasks

were undertaken to ready the vessel for extensive summer voyages and an Atlantic crossing, including system checks, hydraulic and electrical work, hull maintenance, and antifouling application. The project also involved a haul-in/haul-out process with crane assistance, mast and rigging inspections and replacements, interior modifications and enhancements, deck upgrades including new stowage hatches and shower installation, painting touch-ups, and mandatory hull inspections. Overall, the refit project exemplifies a meticulous revitalization effort aimed at enhancing both the functionality and aesthetics of Swan 98-002 Drifter Cube, ensuring its readiness for future voyages.

With each restoration project, Nautor Swan Global Service reaffirms its dedication to restoring Swan yachts to their former glory while incorporating modern amenities and technologies to meet the highest standards of comfort, convenience, and performance.

Quotes

"We've been at Nautor Swan Global Service Yard in Badalona since our first haul out, and since then, we've returned every year for routine maintenance jobs, as well as interior changes, installation of a stern thruster, new rigging, and reinforced lamination if needed. We've found a place with good people, always ready to solve any kind of problem with a smile and deliver high-quality work wherever you are! Thanks to Oscar and all the girls and guys working there for all your assistance and for making us feel at home."
